Deposit Webhook

Codego Crypto Deposit Webhook:

We will notify you crypto deposit via webhook

Web Service – Webhook Deposit Transaction

All the communication will be done via webhook call. You have to provide your endpoint url where transaction status will be sent from our side.

Note:**'event-request-key**' will be sent in the webhook request to verify at your end if this request is real(This key will be provided initially by our team)

Field Details

All the web service responses should be in JSON format .

E.g

{"event":"received-crypto-amount","whitelabel_id":"fddd43-dfvfd32-dfgghn9-xsds333","unique_id":"axeg5 k01-usy5j8f9-6q","address":,"TR4kfg32cb9gieln2g1gd7u7l65zqm5cle"","hashid":"Td345nkn45j54lkvd fnkvjdf","receiver_amount":"202.00","coin":"usdt","network":"trc-20"}
